Teaching Interests:
CIS 160 – Learn to Code in Python;
CIS 365 – Artificial Intelligence; CIS 162 – Computer Science I;
CIS 351 – Computer Architecture; CIS 452 – Operating Systems

Research Interests:
Evolutionary Algorithms, Machine Learning, & Data Science

Personal Interests:
Doing my best to Hockey, Climbing, Running Knife-making, Leather-crafting, Woodworking, Fishing, hunting, gardening and hiking with dogs.

Quotes:
“A society grows great when old men plant trees whose shade they know they shall never sit in.” ~ Greek Proverb
“At one time I thought the most important thing was talent. I think now that – the young man or the young woman must possess or teach himself, train himself, in infinite patience, which is to try and to try and to try until it comes right. He must train himself in ruthless intolerance. That is, to throw away anything that is false no matter how much he might love that page or that paragraph. The most important thing is insight, that is ... curiosity to wonder, to mull, and to muse why it is that man does what he does. And if you have that, then I don't think the talent makes much difference, whether you've got that or not.” ~ William Faulkner
“Thousands of tired, nerve-shaken, over-civilized people are beginning to find out that going to the mountains is going home; that wildness is a necessity; and that mountain parks and reservations are useful not only as fountains of timber and irrigating rivers, but as fountains of life.” ~ John Muir
